SUMMARY

As a Java Full Stack Developer with 2 years of experience, I have a solid foundation in software development, with expertise in both frontend and backend development. With proficiency in technologies such as Angular, Spring Boot, and AWS. I have experience in writing JUnit tests, conducting root cause analysis, and developing and delivering proof of concept presentations. I am a detail-oriented team player with strong problem-solving skills and a passion for delivering high-quality code. Skilled in troubleshooting and resolving technical issues quickly and efficiently. Having passion to work on AWS. Looking for a full-time position as an AWS.

EXPERIENCE

Java Full Stack Engineer
Cognizant   **July 2021 – Present, Hyderabad**
· Conducted thorough debugging and root cause analysis to identify and resolve issues.
· Developed JUnit tests for newly created class files to ensure code quality and prevent potential issues.
· Contributed to the development of a new feature by creating sequence diagrams and building a prototype for quickstart implementation.
· Delivered proof of concept presentations on various technologies such as Docker, JUnit, and microservices to demonstrate their potential use and benefits.

PROJECTS

Tweet APP
Cognizant Internal Skill up Assignment · July 2022 – October 2022
· Designed and developed the backend for a tweet application from end to end using technologies such as DynamoDB, Spring Boot, and Kafka.
· Developed JUnit tests for the tweet application and utilized the SonarLint plugin in IntelliJ IDEA to identify and address any code quality issues flagged by Sonar.
· Participated in the development of the frontend code for a project using Angular.
· Successfully deployed an Angular application to an S3 bucket in AWS and the tweet application backend to Elastic Beanstalk.

Discover– DCI Disputes Migration
Cognizant Technology Solutions · March 2022 – December 2022
· Conducted thorough debugging and root cause analysis to identify and resolve issues.
· Developed JUnit tests for newly created class files to ensure code quality and prevent potential issues.
· Contributed to the development of a new feature by creating sequence diagrams and building a prototype for quickstart implementation.
· Delivered proof of concept presentations on various technologies such as Docker, JUnit, and microservices to demonstrate their potential use and benefits.

Audit Management System
Cognizant Internal Skill up Assignment · November 2021 – December 2021
· Designed, developed, and implemented end-to-end audit authentication and benchmark services.
· Collaborated in the development of the frontend code for an audit management system using Angular.
· Created comprehensive JUnit test suites for all microservices applications with a focus on achieving high code coverage.
· Successfully deployed code using AWS services such as ECS, CodeCommit, CodeBuild, and CodePipeline.

EDUCATION

Bachelor of Technology in computer science
Sree vidyanikethan Engineering College, Tirupati · Tirupati, Andhra Pradesh, India · 2021 · 8.09

CERTIFICATIONS

AWS Cloud Practitioner
Amazon Web Services · 2023

COURSEWORK

Master Java Unit Testing with Spring Boot & Mockito
Udemy · 2022

Go Java Full Stack with Spring Boot and Angular
udemy · 2022

SKILLS

Angular, Spring Boot, Hibernate, Mockito, Core Java, Microservices, Git, MySQL
